

WASTE

Waste must be sorted and dropped at the waste stations in the area.

Food and other bio-waste must be put in the green bags distributed by Middelfart Kommune.

Remaining waste must be sorted and put in the applicable containers for different types of waste. Follow the advise on the containers.

Welcome

Baaring Ege is a special leisure area of natural beauty.

"It is not permitted to build a holiday home area in a forest - but it is allowed to plant a forest in a holiday home area", said architect Axel Henriksen in 1964 when the area took form

The area covered by Baaring Ege naturally consists of a number of hills stretching from land towards Båring Vig (Båring Bay). Where possible, the roads are situated on the hills surrounded by oak woodlands. The homes are placed in such a way that as many as possible have sea view, and so that common green areas lie undeveloped, and reserved for communal use.

Paths to the beach

Access to the beach is only possible on foot - follow the yellow routes on the map.

There is access for all residents to the communal green areas between the roads.

No motorized traffic and parking in the communal green areas.

Public parking and leisure space can be found in the western area along Skyttevej.

Permanent parking of caravans is not permitted all across Baring Ege.

Keep dogs on a lead throughout the area.

Avoid noise in the evenings.

It is forbidden to use fireworks all across Baring Ege, we have many thatched houses.
